Abstract of EP1382322

Cosmetic composition comprises a goniochromic colorant and reflective particles selected from metal-coated natural or synthetic substrates, synthetic substrates coated with metal compounds, particles comprising multiple layers of different refractive index, and metal oxide particles. Independent claims are also included for: (1) make-up method for the skin, lips or visible organs comprising simultaneously or sequentially applying a goniochromic colorant and reflective particles as above; (2) make-up kit for the skin, lips or visible organs comprising a composition containing a goniochromic colorant and a composition containing reflective particles as above.
